Multimedia Appendix 3. Spearman's rank correlation coefficients between the online social features and the BDI scores

		Facebook Social Features								
	Groups	Group	Interests	Likes	Pending	Location	Friends	App- points	Арр-	
		admins			requests	tagging			tips	
Spearman's	-0.127	0.011	-0.160	-0.136	-0.043	-0.266	-0.288	0.374	0.385	
rho										
P value	.36	.94	.24	.32	.76	.05	.03	.005	.004	

The number of location tagging and friends was negatively correlated with BDI score (P = .05 and P = .03 respectively), while the App-points and the number of App-tips viewed had positive correlation (P = .005 and P = .004 respectively).
